Profile

I have just completed BSc Computing at Sheffield Hallam University. I am passionate about website development. I love learning about CSS, JavaScript, PHP, and SQL and I have demonstrated my ability to communicate effectively through group work and my part-time job.

Education and Qualifications

Sheffield Hallam University   *September 2021 – Present*
BSc Computing (Hon) (Predicted First / High 2:1)

Third year modules included: Advanced Data Management (PHP, SQL), DevOps Management, Knowledge Management, New Technologies (Python), Project (Own project idea, created a mobile workout application to track gym workouts using HTML, CSS, AngularJS, Cordova)

Second year modules included: Web applications design and implementation, System Architectures, Project Planning and Service Support, Professional Computing Project, Database Admin and Data Sources.

Sheffield Hallam University   *September 2019 – Nov 2020*
BSc Computer Science for Games (Hon)

First year modules included: Fundamentals of Programming for Games, Introduction to Games Development, Mathematics for Graphics/Computing, Fundamentals of Computer Architecture, Professional Experience and Project Development.

Sheffield City College   *September 2017 – July 2019*

As of July 2019, I completed my Level 3 Extended Diploma in IT and Computing and left with a **DMM** overall grade. My favourite projects during this time were Game Development, Programming, Mobile App Development, and Project Development using tools such as Trello.

Yewlands Academy | Sheffield   *September 2012 – June 2017*

Achieved 8 GCSE's Grade A-C including Maths, English, Science, and Business.

Technical Skills

HTML, CSS (Responsive), Basic JavaScript and AngularJS, SQL, Basic PHP, GitHub

University Projects

My final year project was a workout tracking application for android. You can see this on my github in website form.

- Workout Application https://josephquayle.github.io/workoutAppTest/

Another assignment during this year heavily involved PHP and SQL where I had to create a criminal database management system for a forensic team where all the members from different units

could sign in, add suspects, victims, evidence, and test results. Before creating the system, I had to create the entity relationship diagram and class diagram.

Web Development Projects

During my year off due to swapping courses, I put my time into learning responsive CSS and started learning JavaScript fundamentals. The best way to learn something is to do it, so I spent lots of time making lots of different sites. Here are a few examples of the type of sites I made. You can see everything I have made on my GitHub account https://github.com/JosephQuayle.

Work Experience

General Assistant | Tesco Supermarket | Part Time
October 2019 – Present

- Serving customers on the till.
- Helping customers with any questions.
- Stacking shelves.
- Taking deliveries.
- Cleaning the shop floor.

This job requires me to:

- Be able to work with different types of people of different age groups.
- Work effectively in a team environment as well as independently through communicating to each other over our headsets, asking for help when needed and updating team members and managers when jobs have been complete.
- Manage my time effectively, ensuring that I get jobs done as fast as possible while maintaining a good standard.

Office Duties | AMS Electrical Contracting Limited
March 2016 – March 2016 (5 Day Work Experience Placement)

- Set up computers, updated their OS and installed antimalware.
- Input a lot of financial data accurately into Microsoft excel spreadsheets.
- Sorted many invoices.
- Made sure the company had the right number of components for their upcoming jobs.
- General printing/photocopying duties.

During this 5-day work experience I realised I was capable of inputting data accurately and efficiently as well as relaying information onto superiors as fast as possible so they could get the components ready for the jobs.

Hobbies and Interests
My favourite things to do in my spare time are going to the gym to stay healthy, as well as playing games such as counter strike and rocket league. I also love metal music and going to concerts.
